29 Bed Unit + Procedural Newborn Nursery

Target RN to Patient ratio: 3-4 mother/baby couplets per RN

Team also includes Attendings, Residents, CNAs, LPNs and Unit Secretaries

Every 3rd weekend/holiday requirement

Open RN Positions: 24 Hr Night Shift

Patient Population

- Our Maternity unit primarily cares for mothers and babies during their postpartum period
- Our unit fosters a family environment as visitation allows and supports women through compassionate care and education
- All our nurses are trained to postpartum, high risk antepartum, well newborn nursery, and post-op gyn
- St. Francis is a teaching hospital, and our staff work closely with OB Residents

Prior Experience Suggested

- Obstetric and/or fetal monitoring experience preferred
- Capstone or internship in obstetrics preferred if new graduate

Orientation

- ≥6 weeks includes didactic, simulations, classes, and unit-based training
- BLS, NRP, NCC Certification in Electronic Fetal Monitoring (within 1 year of hire)

Good to know!

- Our division has many safety programs in place including Postpartum Hemorrhage, Shoulder Dystocia, Severe Hypertension, etc. with ongoing education and multidisciplinary simulations for all staff
- Maternity might be a good fit for you if you love patient education, can multitask, and prioritize, and have a passion for caring for women and infants!
