Trinity Health Of New England
COVID-19 Vaccine Clinic Guidelines

- Trinity Health Of New England’s COVID-19 vaccine clinics adhere to the current visitation guidelines, which state no visitors are allowed at this time. In accordance to this policy, please do not bring additional people with you to your vaccine appointment.
  - Exceptions: Those utilizing medically assistive devices such as wheelchairs, walkers, and canes who need mobility assistance may have ONE companion.
- The COVID-19 Vaccine Clinic is an ambulatory clinic, meaning it is not part of the hospital. As such, the clinic does not have the capacity or equipment to assist patients to or from the parking lot.
- We CAN NOT accept walk-ins for vaccine administration. Please visit our Vaccine Clinic ONLY if you have an appointment.
- Please do not arrive to your appointment more than 30 minutes in advance. Due to limitations in parking, as well as social distancing concerns, we cannot allow patients to crowd in entrance and waiting areas.
- Please be prepared to wait in line for up to 15 minutes, as the registration and administration of the vaccine does take time.
- Masks are required to be properly worn at all times in the Vaccine Clinic.
- Please follow social distancing protocols. Decals on the floor indicate proper 6-foot distance while waiting in line and in other areas of the Vaccine Clinic.
