| 6 | Has the patient had an inadequate response or intolerance to Doptelet (avatrombopag)?  
[No further questions.]                                                   | Yes | No |
| 7 | Did the patient’s platelet count respond to the requested drug as evidenced by either of the following:  
A) current platelet count is less than or equal to 200,000 cells per microliter,  
B) current platelet count is greater than 200,000 cells per microliter to less than or equal to 400,000 cells per microliter and dosing will be adjusted to a platelet count sufficient to avoid clinically important bleeding?  
[No further questions.]                                                | Yes | No |
| 8 | Does the patient have a diagnosis of thrombocytopenia associated with chronic hepatitis C?  
[If no, then skip to question 12.]                                     | Yes | No |
| 9 | Is the patient currently receiving treatment with the requested drug?  
[If no, then skip to question 11.]                                      | Yes | No |
|10 | Is the patient currently receiving interferon-based therapy?  
[No further questions.]                                                 | Yes | No |
|11 | Will the requested drug be used for the initiation and maintenance of interferon-based therapy?  
[No further questions.]                                                 | Yes | No |
|12 | Does the patient have a diagnosis of severe aplastic anemia?  
[If no, then no further questions.]                                     | Yes | No |
|13 | Is the patient currently receiving treatment with the requested drug?  
[If yes, then skip to question 16.]                                      | Yes | No |
|14 | Will the requested drug be used in combination with standard immunosuppressive therapy for first-line treatment?  
[If yes, then no further questions.]                                    | Yes | No |
|15 | Has the patient tried and had an insufficient response to immunosuppressive therapy?  
[No further questions.]                                                 | Yes | No |
|16 | Did the patient’s platelet count respond to the requested drug as evidenced by either of the following:  
A) current platelet count is 50,000 to 200,000 cells per microliter,  
B) current platelet count is greater than 200,000 cells per microliter to less than or equal to 400,000 cells per microliter and dosing will be adjusted to achieve and maintain an appropriate target platelet count?  
[If yes, then no further questions.]                                    | Yes | No |
|17 | Is the patient’s current platelet count less than 50,000 cells per microliter?  
[If no, then no further questions.]                                     | Yes | No |
|18 | Is the patient transfusion-independent?  
[If yes, then no further questions.]                                     | Yes | No |
