

Introducing a new care model.

We are excited to introduce
**Trinity Health Virtual
Connected Care™** —
a transformational team care model
designed to improve patient care while
providing nurses and care partners
new opportunities and support.
Locally based virtual RNs (vRNs)
provide 24/7 care and help to patients
and their families, while collaborating
with bedside RNs and care partners
to provide excellent care.

**Virtual RNs (vRNs) provide onsite
care 24/7 utilizing technology.**

Trinity Health Virtual Connected Care™ utilizes
onsite virtual nurses (vRNs) to provide expert level
support through technology. These experienced
nurses communicate directly with patients via an
in-room TV monitor allowing patients to have access
to the care team at any time.

**Bedside RNs and Care Partners
are able to collaborate with
experienced vRNs.**

Trinity Health Virtual Connected Care™ provides
mentoring and support for bedside nurses and care
partners through the 24/7 support of the onsite
virtual nurse. Our team model allows early career
nurses to build confidence while providing complex
care. One of many ways Trinity Health is ensuring
nurses have opportunities and support in every
stage of their career.
