WHY CHOOSE SAINT FRANCIS?

Flexible, Personalized Training
Customize your residency experience through diverse required and elective rotations in community pharmacy, ambulatory care, specialty pharmacy, population health, and transitions of care.

Growing Community Pharmacy Practice
Train in an expanding outpatient pharmacy program supported by a $1.6 million renovation and enhanced clinical services opening new opportunities for patient care and innovation.

Strong Residency Foundation
Benefit from experienced preceptors and a well-established residency culture alongside Saint Francis' PGY1 and PGY2 residency programs.

Teaching Certificate Program
Earn a Teaching Certificate through the University of Connecticut School of Pharmacy and Pharmaceutical Sciences while developing skills in teaching, precepting, and mentoring.

Integrated Clinical Practice
Work alongside physicians, advanced practice providers, nurses, and other healthcare professionals to optimize medication therapy and improve patient outcomes.

Academic Medical Center Experience
Teach, precept students, participate in research, and contribute to quality improvement initiatives within a leading teaching hospital.

Pharmacy Residency Program

PGY1 Community-Based

Saint Francis Hospital
Trinity Health

OUR PROGRAM

The PGY1 Community-Based Pharmacy Residency at Saint Francis Hospital offers advanced training within a well-established and highly regarded residency program. As part of Trinity Health Of New England, residents gain experience across community pharmacy, ambulatory care, specialty pharmacy, transitions of care, and population health.

Residents work directly with patients through comprehensive medication management, immunization services, chronic disease management, and collaborative practice opportunities, allowing them to practice at the top of their licensure while improving patient outcomes.

Launching during a major expansion of Saint Francis outpatient pharmacy services, supported by a $1.6 million investment, the program provides unique opportunities to help shape innovative community-based care models.

As a leading teaching hospital and academic medical center, Saint Francis also offers robust experiences in teaching, research, leadership, and interdisciplinary collaboration, preparing graduates for successful careers in community and ambulatory care pharmacy practice.

PROGRAM STRUCTURE

The PGY1 Community-Based pharmacy residency program builds upon Doctor of Pharmacy (PharmD) education and outcomes to develop pharmacists who provide comprehensive, patient-centered care across community pharmacy, ambulatory care, specialty pharmacy, and population health settings. Through integrated experiences within Trinity Health of New England, residents develop the clinical, operational, teaching, and leadership skills needed to advance community-based pharmacy practice.

Upon completion of the program, residents will:

- Be eligible for board certification
- Be prepared for advanced clinical pharmacist positions in community-based and ambulatory care settings
- Be eligible to pursue PGY2 residency training
- Gain experience precepting APPE pharmacy students and other learners
- Obtain a Teaching Certificate through the University of Connecticut School of Pharmacy and Pharmaceutical Sciences

Learning experience schedules are designed to align with resident interests while ensuring achievement of all ASHP residency competency areas and goals.

PROGRAM REQUIREMENTS

- Successful completion of all required learning experiences
- Completion of an IRB-approved residency research project and quality improvement initiative
- Presentation of research and/or professional work at local, regional, and national meetings
- Teaching Certificate completion

RESIDENCY INFORMATION

Type: PGY1 Community-Based (12-Month Program)
Positions: 1
